SUPPORT SERVICES GOALS

Support services are essential to the educational program. The Board serves as trustee of District facilities and overseer of school operations for the purpose of providing the facilities and services which support a thorough and efficient educational program.

In order to provide support services for the overall educational program, the Board develops goals that include a:

1. safe and pleasant physical environment for teaching and learning for the school community through the continual evaluation of the facilities;
2. transportation program for the safe transporting of students to and from extracurricular and cocurricular activities;
3. food services program which supports nutrition through participation in the National Child Nutrition Programs and
4. safety program which evaluates personnel, buildings, vehicles, equipment and supplies to maintain a safe environment and to minimize the effects of a disaster.

SAFETY PROGRAM

The Board is concerned with the safety of all students, employees and members of the school community present on District property and at all District-sponsored events at other sites. The Board directs the administration to develop a safety program.

The Superintendent/designee has responsibility for the safety program of the District and develops written procedures to comply with all applicable Federal and State laws and regulations.

The practice of safety is also a part of the instructional plan of the District through educational programs. The educational program includes instruction in traffic and pedestrian safety, fire prevention, in-service training and emergency procedures appropriately geared to students at different grade levels.

All staff are encouraged to participate in the safety practices of the District by providing recommendations that ensure a safe environment for all.

SAFETY PROGRAM

The Board is committed to maintaining a safe environment in all of the District's schools. The Board believes that school crime and violence are multifaceted problems that need to be addressed in a manner that utilizes all available resources in the community through a coordinated effort of District personnel, law enforcement agencies and families. The Board further believes that school administrators and local law enforcement officials must work together to provide for the safety and welfare of students while they are at school or a school-related event. The Board believes that the first step in addressing school crime and violence is to assess the extent and nature of the problem(s), and then plan and implement strategies that promote school safety and minimize the likelihood of school crime and violence. To that end, the Superintendent shall develop a School Safety Plan with input from representatives or the local law enforcement agency; the local Fire Marshall(s) or his/her designee(s); representative(s) from emergency medical services;

1. members of the Board;
2. building administrators;
3. representatives from the local emergency management service agency;
4. classified Staff and
5. teachers.

The Superintendent convenes a meeting periodically for the purpose of reviewing the School Safety Plan, and making modifications as deemed necessary and proper; identifying additional training that might be needed and discussing any other such related matters as may be deemed to be necessary by the participants. Participants in this meeting shall include the Superintendent; representatives of the local law enforcement agency; the local Fire Marshall(s) or his/her designee(s) and representative(s) from emergency medical services; and

1. members of the Board;
2. building administrators;
3. representative(s) from the local emergency management service agency;
4. classified Staff member(s) and
5. teacher(s).

The Superintendent makes a report to the Board about this review and recommends the approval and adoption of any proposed revisions or additions to the School Safety Plan.

Persistently Dangerous Schools

The Board recognizes that State and Federal law require that the District report annually incidents which meet the statutory definition of violent criminal offenses that occur in a school, on school grounds, on school conveyance or at a school-sponsored activity. It is further understood that the State Department of Education will then use this data to determine whether or not a school is considered persistently dangerous as defined by state policy.

Pursuant to the Board's stated intent to provide a safe school environment, the school administrators are expected to respond appropriately to any and all violations of the Student Code of Conduct, especially those of a serious, violent nature. In any year where the number of reportable incidents of violent criminal offenses in any school exceed the threshold number established in state policy, the Superintendent shall:

1. discuss this at the annual meeting for the purpose of reviewing the School Safety Plan so that a plan of corrective action can be developed and implemented in an effort to reduce the number of these incidents in the subsequent year.
2. convene a meeting of the building administrator, representative(s) of the local law enforcement agency, and any other individuals deemed appropriate for the purpose of developing a plan of corrective action that can be implemented in an effort to reduce the number of these incidents in the subsequent year.

The Superintendent makes a report to the Board about this plan of corrective action and shall recommend approval and adoption of it.

In the unexpected event that the number of reportable incidents in three consecutive school years exceeds the statutory threshold and the school is identified as persistently dangerous, students attending the school shall have the choice option as provided in policy JFCL, Unsafe Schools (Persistently Dangerous Schools).

In addition, the Superintendent shall

1. discuss the school's designation as a persistently dangerous school at the annual meeting for the purpose of reviewing the School Safety Plan so that a plan of corrective action can be developed and implemented in an effort to reduce the number of these incidents in the subsequent year.

2. convene a meeting of the building administrator, representative(s) of the local law enforcement agencies, and other individuals deemed appropriate for the purpose of developing a plan of corrective action that can be implemented in an effort to reduce the number of these incidents in the subsequent year.

(Approval date: December 22, 2009)

REPORTING OF HAZARDS

The Board is concerned with the safety of students and staff and, therefore, complies with all Federal and State laws and regulations to protect students and staff from hazards that may result from industrial accidents or from the presence of asbestos materials and products or conditions identified by the State Board of Health as injurious to health and safety.

Toxic Hazards

Toxic hazards exist in chemicals and other substances used in the school setting such as in laboratories, science classrooms, kitchens and in the cleaning of rooms and equipment.

The Superintendent appoints an employee to serve as the District's Toxic Hazard Preparedness (THP) officer. This duty is assigned to the Director of District Services and Facilities. The THP officer:

1. identifies potential sources of toxic hazard in cooperation with material suppliers who supply the THP officer with material safety data sheets (MSDS);
2. ensures that all incoming materials, including portable containers, are properly labeled with the identity of the chemical, the hazard warning and the name and address of the manufacturer or responsible party;
3. maintains a current file of MSDS for hazardous materials present on District property;
4. designs and implements a written communication program which:
 - A. lists hazardous materials present on District property;
 - B. details the methods used to inform staff and students of the hazards and
 - C. describes the methods used to inform contractors and their employees of any hazardous substances to which they may be exposed and of any corrective measures to be employed;
5. conducts a training program for all District employees to include such topics as detection of hazards, explanation of the health hazards to which they could be exposed in their work environment and the District's plan for communication, labeling, etc. and

6. establishes and maintains accurate records for each employee at risk for occupational exposure including name, Social Security number, hepatitis B vaccine status, results of exams, medical testing and follow-up procedures for exposure incidents and other information provided by and to health care professionals.

In fulfilling these responsibilities, the THP officer may enlist the aid of county and municipal authorities and others knowledgeable about potential toxic hazards.

Asbestos Hazards

In its efforts to comply with the Asbestos Hazard Emergency Response Act, the Public Employment Risk Reduction Act (PERRA) and the Asbestos Abatement Contractors Licensing Act, the Board recognizes its responsibility to:

1. inspect all District buildings for the existence of asbestos or asbestos-containing materials;
2. take appropriate action based on the inspections;
3. establish a program for dealing with friable asbestos, if found;
4. maintain a program of periodic surveillance and inspection of facilities or equipment containing asbestos and
5. comply with EPA regulations governing the transportation and disposal of asbestos and asbestos-containing materials.

The Superintendent appoints a person to develop and implement the District's Asbestos-Management Program which ensures proper compliance with Federal and State law and the appropriate instruction of staff and students.

The Superintendent also ensures that, when conducting asbestos abatement projects, each contractor employed by the District is licensed pursuant to the Asbestos Abatement Contractors Licensing Act.

Occupational Exposure Training

All employees with occupational exposure are required to participate in a training program at the time of their initial assignment to tasks where occupational exposure may occur.

Follow-up training for employees is provided one year after their initial training. Additional training is provided when changes such as modifications of tasks and procedures or institution of new tasks and procedures affect employees' occupational exposure.

A record of attendance at occupational exposure training is completed and maintained by the THP officer following each training session. These records are maintained for three years from the date of the training.

Records Availability

All records required to be maintained are made available upon request for examination and copying by the employee, employee representatives and under the provisions of PERRA. Medical records, however, are not made available to employee representatives or other persons without written consent of the employee.

Other Conditions Injurious to the Safety or Health of Building Occupants

In addition to the reporting of toxic hazards, the Board directs the Superintendent/designee to comply with all board of health inspections, as required by OAC 3701-54, to ensure that conditions injurious to the safety or health of persons on District property are minimized.

During a board of health inspection, each building principal/designee provides:

1. access to the building and grounds at any time during regular school hours;
2. a record of inspections of the school grounds and buildings for dangerous and recalled products that have been identified by the State Board of Health;
3. any records or other information the board of health considers necessary to evaluate the health and safety of the school and
4. a representative who accompanies the sanitarian during the course of the inspection, with advance notice from the board of health and upon request of the sanitarian.

If a report is submitted to the board of health following a school inspection, the Superintendent/designee develops and submits a written plan for abatement of conditions identified by the inspection report. The plan of abatement is submitted within 60 days of receipt of the inspection report.

The Superintendent/designee provides written notification to the board of health when abatement, as outlined in the plan, has been completed.

Each building is surveyed quarterly, by a representative appointed by the Superintendent/designee, for dangerous products and conditions that have been identified in notices from the board of health. All dangerous products or conditions found on school grounds or within school buildings are abated or controlled, immediately or within 30 days of receipt of the notice from the board of health. Any action taken is documented on the board of health transmittal form. Completed transmittal forms are retained in a central location for verification by board of health inspectors.

Liability Disclaimer

Nothing in this policy should be construed in any way as an assumption of liability by the Board for any death, injury or illness that is the consequence of an accident or equipment failure or negligent or deliberate act beyond the control of the Board or its officers and employees.

FIRST AID

The school nurse develops guidelines for the emergency care of any student or staff member who is injured or becomes ill at school or while engaged in a school-sponsored activity. The guidelines are reviewed by the Board prior to implementation.

The guidelines provide for at least one person in each building to have special training in first aid. In the case of an emergency involving a student, the emergency medical authorization form is followed and efforts are made to contact the parent/guardian.

Staff Handbooks

FIRST AID

The following requirements shall be adhered to by all personnel.

1. A school nurse or other trained person is responsible for administering first aid in each building. Although each nurse is assigned a school or group of schools for providing regular nursing services, a nurse is subject to call from any school if needed. An emergency medical service will be called in case of serious illness or injury.
2. The parents of all students are asked to sign and submit an emergency medical authorization form which indicates the procedure they wish to be followed in the event of a medical emergency involving their child. The forms are kept readily accessible in the health center of each school.
3. Only emergency care and first aid are provided. A physician or nurse provides training for first-aid treatment and emergency care for various types of illness and injury. Use of medications is limited to topical applications as directed by a physician for certain types of injuries or to such medication as might have been officially authorized for an individual child.
4. In cases in which the nature of an illness or an injury appears serious, the parent(s) are contacted and the instructions on the student's emergency card are followed. In extreme emergencies, arrangements may be made for a student's immediate hospitalization whether or not the parent(s) can be reached.
5. No elementary student who is ill or injured is sent home alone. Junior and senior high students may be sent home if the illness is minor and the parents, who have authorized such dismissal on the emergency medical forms, have been informed in advance.
6. Board-approved procedures are followed to guard against athletic injuries and to provide care and emergency treatment for injured athletes. Coaches meet all requirements of the State Board of Education.

(Approval date: December 22, 2009)

BLOODBORNE PATHOGENS

Staff and students incur some risk of infection and illness each time they are exposed to bodily fluids or other potentially infectious materials. While the risk to staff and students of exposure to body fluids due to casual contact with individuals in the school environment is very low, the Board regards any such risk as serious.

Consequently, the Board directs adherence to universally recognized precautions. Universally recognized precautions require that staff and students approach infection control as if all direct contact with human blood and body fluids is known to be infectious for HIV, HBV and/or other bloodborne pathogens.*

To reduce the risk to staff and students by minimizing or eliminating staff exposure incidents to bloodborne pathogens, the Board directs the Superintendent to develop and implement an exposure control plan.

The plan includes annual in-service training for staff and students; first-aid kits in each school building and each student transportation vehicle; correct procedures for cleaning up body fluid spills and for personal cleanup.

Training is followed by an offer of immunization with hepatitis B vaccine for all staff who are required to provide first aid to students and/or staff. The vaccine is also offered to all staff who have occupational exposure as determined by the administrator.

CROSS REF.: GBEA, HIV/AIDS (Human Immunodeficiency Virus/Acquired Immune Deficiency Syndrome) (Also JHCCA)

* Bloodborne pathogens are pathogenic microorganisms that are present in human blood and can cause disease in humans. These include, but are not limited to, hepatitis B virus (HBV) and human immunodeficiency virus (HIV).

EMERGENCY/SAFETY PLANS

The Board acknowledges that the safety and well-being of students and staff are high priorities. Although emergencies cannot be predicted, effective prevention and management strategies are used to minimize the effects of emergency situations arising in the District.

An emergency is defined as an event which threatens the actual safety and security of students, employees or visitors of the District or whose impact threatens the feeling of safety and security, both of which are detrimental to a positive learning environment. Emergencies include fire, natural disasters, medical emergencies, industrial accidents, suicide, death of a student or employee, acts of violence, trauma and terrorism.

Comprehensive School Safety Plans and Drills

The Board directs the Superintendent/designee to prepare emergency/safety plans for use by staff and students. The plans are posted in each classroom and other areas accessible to students.

The comprehensive safety plan sets a protocol for addressing and responding to serious threats to the safety of the school property, students, staff and volunteers. Each protocol includes procedures deemed appropriate by the Board or governing authority for responding to threats and emergency events including, but not limited to, notification of appropriate law enforcement personnel, calling upon specified emergency response personnel for assistance and informing parents of affected students.

The administration reviews the plan, considering the most current information dealing with the subjects, as well as making relevant information about the plan known to the community. When the comprehensive safety plan is used, assessment of the way the emergency was handled is completed by the Board and the administration. Suggestions for improvement, if necessary, are solicited from all stakeholders.

State law determines the type and number of drills the District must conduct in order to adequately prepare staff and students for emergency and disaster situations. Drills provide both students and staff with practice in responding to emergency conditions should such conditions occur.

A copy of each school building's current comprehensive safety plan and blueprint is filed with the law enforcement agency that has jurisdiction over the school building and, upon request, the fire department that serves the political subdivision in which the school building is located. A copy of each school building's current comprehensive safety plan and floor plan is filed with the Ohio Attorney General. The floor plan is used solely by law enforcement responding to an emergency in the building and is not a public record.

The District's comprehensive safety plan must be updated every three years and within 90 days whenever a major modification to an individual school building necessitates changes in that building's plan.

Administrative Rules/Protocols

The Board directs each building principal/designee to develop administrative rules/protocols regarding the topics listed below. The rules/protocols are kept in the central office and produced to board of health sanitarians, upon request, during board of health inspections.

1. A list of dangerous or recalled products, as identified by the State Board of Health.
2. Radon rules or protocols including evidence that the school has been built radon resistant or has been tested for radon within the past five years.
3. An asbestos management plan including evidence of inspection for asbestos within three years, evidence of periodic surveillance within the past six months and a copy of the yearly written notice to the public referencing asbestos inspection and the availability of the asbestos management plan for review.
4. A school-wide safety or crisis management plan, which provides a protocol for responding to any emergency events and a protocol providing for immediate notification to the appropriate fire department and board of health in the event of any spill or release of a hazardous substance on school grounds.
5. Guidance regarding bloodborne pathogen risk reduction.
6. Procedures for administering medications to students.
7. A written comprehensive safety plan addressing:
 - A. safety management accountabilities and strategies;
 - B. safe work practices;
 - C. accident analysis procedures;
 - D. job safety analysis procedures;
 - E. safety committees and employee involvement strategies;
 - F. employee safety and health training;

- G. treatment of sick or injured workers;
 - H. safety and health hazard audits;
 - I. ergonomics;
 - J. transportation safety;
 - K. identification and control of physical hazards;
 - L. substance abuse;
 - M. school violence prevention and
 - N. personal protective equipment.
8. A written chemical hygiene plan, which sets forth procedures, equipment, personal protective equipment and work practices that are capable of protecting employees and students from the health hazards of chemicals in the school.
 9. Material data sheets for every hazardous chemical used in the school building or on the school grounds for cleaning, maintenance or instruction. (These must be kept where the chemicals are stored in addition to the central office of each building).
 10. Protocols on staff and student hand washing.
 11. No smoking signs.
 12. The District's integrated pest management policy.
 13. A flushing protocol if lead pipes or lead-lined storage wells are used.
 14. Protocols for using automated external defibrillators (AEDs).
 15. Protocols for responding to in-school crises, including student crime, suicide, death of student or employee, acts of violence (including bomb threats and school intruders), trauma, accidents and/or terrorism.
 16. Protocols for the management of students with life-threatening allergies.

DISASTER RECOVERY PLAN

Electronic Data Processing Disaster Recovery Plan

The Board is committed to maintaining and protecting the District's information system. The Board believes that a complete and accurate information system which includes educational, student, fiscal and personnel information is vital to the Board's ability to deliver uninterrupted educational service to the community it represents. To that end, the Superintendent, in conjunction with the Treasurer, is directed to develop, test and maintain an Electronic Data Processing Disaster Recovery Plan for use in the event a disaster should disable the District's electronic data processing equipment.

The plan may include a reciprocal agreement with a neighboring school district or data acquisition site, which outlines the scope of reciprocal services such as access to the computer facility of the alternative, computer time and personnel assistance and costs.

[Adoption date: December 22, 2009]

CROSS REF.: MEC, Metropolitan Educational Council

EMERGENCY CLOSINGS

The Superintendent may close the schools, dismiss students early or delay the opening of schools in the event of hazardous weather or other emergencies which threaten the safety or health of students or staff members.

In the event that the Superintendent/designee shortens the school day by no more than two hours due to hazardous weather, either at the beginning or the end of the given school day, that day will not be designated a calamity day.

Parents, students and staff members are informed early in each school year of the method of notification in the event of emergency closings or early dismissals.

Prior to September 1 of each year, the Board adopts a resolution specifying a contingency plan under which the students make up days the schools were closed because of calamity days. These make-up days are beyond the five calamity days provided for by law.

The contingency plan cannot in any way conflict with the collective bargaining agreement.

BUILDINGS AND GROUNDS SECURITY

Buildings and grounds constitute one of the greatest investments of the Board. It is in the best interest of the District to protect such investments.

Security includes maintenance of a secure building and protection from fire hazards, faulty equipment and unsafe practices in the use of electrical, plumbing and heating equipment. The Board shall cooperate with local law enforcement agencies and fire departments and with insurance company inspectors.

Access to buildings and grounds outside of regular school hours is limited to personnel whose work requires such access.

VANDALISM

Parents and students are made aware of the legal consequences of vandalism. Students, employees and citizens of the District are urged to report any incidents of vandalism to property belonging to the District together with the name(s) of the person(s) believed to be responsible. The Board may offer a reward for information leading to the arrest and conviction of any person who steals or damages District property.

The Superintendent is authorized to sign a criminal complaint and to press charges against perpetrators of vandalism against school property. The Superintendent is further authorized to delegate authority to sign such complaints and to press charges as he/she sees fit.

Any student found guilty of any form of vandalism or defacement of school property may be subject to suspension or expulsion.

Parents are liable up to the amount provided by law for the willful destruction of property by a minor in their custody or control. If parents are found liable for monetary damages and are unable to make restitution, the Board may allow the parents and/or students to perform community service for the District instead of repayment of the damages.

BUILDINGS AND GROUNDS MAINTENANCE

The Board recognizes that the fixed assets of this District represent a significant investment of this community and their maintenance is of prime concern to the Board.

The Board directs the conduct of a continuous program of inspection, maintenance and rehabilitation for the preservation of all school buildings and equipment. Wherever possible and feasible, maintenance is preventive.

The Superintendent or designee develops, for implementation by the custodial staff, a maintenance program which includes a regular summer program of facilities repair and conditioning and a long-range program of building modernization.

The Superintendent develops and promulgates to the custodial staff such rules as may be necessary for the ongoing maintenance and good order of the physical plant and for the expeditious repair of those conditions which threaten the safety of the occupants or the integrity of the plant.

[Adoption date: December 22, 2009]

ENERGY CONSERVATION

Measures should be taken to conserve energy in order to protect natural resources and to minimize the District's expenditures for energy consumption. The Superintendent, supported by the school staff, develops and implements operating procedures to reduce energy consumption in the schools. The Board also directs the Superintendent and the staff to continually assess the consumption of energy and make recommendations for improved use of energy resources.

One major component of the District's energy management plan is periodic building energy audits which may take into consideration the:

1. type of construction of the building;
2. mechanical systems (heating, cooling, ventilation);
3. lighting and use of glass;
4. use of the building (during the day, after school, evenings or weekends);
5. utility bills or measurement of fuel consumed;
6. local weather;
7. age of the building;
8. floor space and
9. condition of insulation.

The Board may approve the purchase and installation of energy conservation measures via shared savings and/or installment contracts. The Board may dispense with competitive bidding in awarding such contracts in accordance with law.

INTEGRATED PEST MANAGEMENT

The Board is committed to providing students with a safe learning environment free of pests, pesticides and other harmful chemicals through adoption of an integrated pest management policy. The goals of the District's integrated pest management program are to:

1. provide the healthiest learning environment possible by preventing unnecessary exposure of children and staff to toxic pesticides;
2. promote safer alternatives to chemical pesticides while preventing economic and health damage caused by pests;
3. ensure that clear and accurate notification concerning the use of pesticides is given so that measures may be taken to prevent and address pest problems effectively without endangering the health of those within the school building and
4. reduce the need for reliance on chemical pesticides.

The Board directs the administration to develop regulations that detail cost-effective strategies that reduce the use of pesticides that pose health risks to students and staff. The regulations must include procedures for the identification of pests and conditions that attract pests, prevention and monitoring techniques, education and training, approved least toxic chemical use and prenotification of chemical use.

In order to keep the facilities and grounds safe, the administration may investigate a variety of chemical and nonchemical methods that are designed to control pests effectively while minimizing potential exposure to students and staff.

MAINTENANCE AND CONTROL OF MATERIALS

The Board believes that District-owned equipment is a valuable resource which may be loaned for community use under certain conditions only, provided that such use does not infringe on the original and necessary purpose of the equipment or interfere with the educational program of the District.

The Board may lend specific items of equipment on the written request of the user and approval granted by the Superintendent.

The user of District-owned equipment is fully liable for any damage or loss occurring to the equipment during the period of its use and is responsible for its safe return.

The Board reserves the right to request a security deposit in proportion to the value of the equipment.

[Adoption date: December 22, 2009]

COMPUTER/ONLINE SERVICES
(Acceptable Use and Internet Safety)

Technology can greatly enhance the instructional program as well as the efficiency of the District. The Board recognizes that careful planning is essential to ensure the successful, equitable and cost-effective implementation of technology-based materials, equipment, systems and networks.

Computers and use of the District network or online services support learning and enhance instruction as well as assist in administration. Computer networks allow people to interact with many computers; the Internet allows people to interact with hundreds of thousands of networks.

All computers are to be used in a responsible, efficient, ethical and legal manner. Failure to adhere to this policy and the guidelines below will result in the revocation of the user's access privilege. Unacceptable uses of the computer/network include but are not limited to:

1. violating the conditions of State and Federal law dealing with students' and employees' rights to privacy;
2. using profanity, obscenity or other language which may be offensive to another user or intended to harass or bully other users;
3. copying commercial software and/or other material in violation of copyright law;
4. using the network for financial gain, for commercial activity or for any illegal activity;
5. "hacking" or gaining unauthorized access to other computers or computer systems, or attempting to gain such unauthorized access;
6. accessing and/or viewing inappropriate material and
7. downloading of freeware or shareware programs.

The Superintendent/designee shall develop a plan to address the short- and long-term technology needs and provide for compatibility of resources among school sites, offices and other operations. As a basis for this plan, he/she shall examine and compare the costs and benefits of various resources and shall identify the blend of technologies and level of service necessary to support the instructional program.

Because access to online services provides connections to other computer systems located all over the world, users (and parents of users who are under 18 years old) must understand that neither the school nor the District can control the content of the information available on these systems. Some of the information available is controversial and sometimes offensive.

The Board does not condone the use of such materials. Employees, students and parents of students must be aware that the privileges to access online services are withdrawn from users who do not respect the rights of others or who do not follow the rules and regulations established. A user's agreement is signed to indicate the user's acknowledgment of the risks and regulations for computer/online services use. The District has implemented technology-blocking measures to prevent students from accessing inappropriate material or materials considered to be harmful to minors on school computers. The District has also purchased monitoring devices which maintain a running log of Internet activity, recording which sites a particular user has visited.

"Harmful to minors" is defined as any picture, image, graphic image file or other visual depiction that:

1. taken as a whole and with respect to minors appeals to a prurient interest in nudity, sex or excretion;
2. depicts, describes or represents, in a patently offensive way with respect to what is suitable for minors, an actual or simulated sexual act or sexual contact, actual or simulated normal or perverted sexual acts or lewd exhibition of genitals or
3. taken as a whole, lacks serious literary, artistic, political or scientific value as to minors.

Annually, a student who wishes to have computer network and Internet access during the school year must read the acceptable use and Internet safety policy and submit a properly signed agreement form. Students and staff are asked to sign a new agreement each year after reviewing the policies and regulations of the District.

SCHOOL BUS IDLING

The Board is committed to transporting students on school buses in a manner that is safe and consistent with the Board's goal of resource conservation. The Board recognizes that accumulated emissions from diesel engines can be harmful to students and bus drivers. Also, unnecessary engine idling wastes diesel fuel and financial resources. Therefore, the Board prohibits all unnecessary diesel engine idling in excess of 15 minutes.

Diesel engine idling in excess of five minutes in school loading zones is not permitted unless the operation of a wheelchair lift is required. This policy applies to all buses used to transport students to and from school, cocurricular/extracurricular activities, field trips and other school-related activities.

The Board directs the Superintendent/designee to develop and maintain regulations to implement this policy.

STUDENT TRANSPORTATION IN PRIVATE VEHICLES

School bus transportation is provided for all officially approved transportation requests to and from student activities. The use of private vehicles for transportation of students, volunteers, teachers and other employees to and from student activities is discouraged. If the need arises, transportation by private vehicles is permitted only if previously approved by the appropriate administrator.

If it is necessary to use private vehicles, evidence must be presented to the appropriate administrator that the vehicle and driver are covered for liability, medical payments, physical damage and uninsured motorist liability. The Board maintains excess insurance through a nonownership liability endorsement to its bus fleet insurance policy covering all private vehicles used for transportation to and from student activities. This excess insurance provides compensation for injury or death to any student or authorized passenger caused by any accident arising out of or in connection with the operation of a private vehicle transporting students and other authorized passengers. The amounts and terms must be agreed upon by the Board and the insurance company.

Professional staff members are responsible for the discipline and control of students while transporting students in private vehicles. Drivers who are not professional staff members report student misconduct to the principal.

FOOD SERVICES MANAGEMENT/
FREE AND REDUCED-PRICE FOOD SERVICES

The Board operates a food services program in its schools. Food preparation is centralized for elementary, intermediate and secondary schools when appropriate.

Food services include breakfasts and lunches in all schools through participation in the National Child Nutrition Programs.

The food services staff cooperates with the principals of the schools in matters essential to the proper functioning of the food services program. The responsibility for control of students using the cafeteria rests with the building principal.

All prices set for school breakfasts, lunches and milk are subject to Board approval, except for a la carte food prices. The Food Services Supervisor sets these prices without Board approval.

As required for participation in the National Child Nutrition Programs, the Board agrees that:

1. breakfast and a "Type A" lunch are made available to students, provided at least one-fifth of the students are eligible under Federal law for free meals;
2. breakfast is made available in every school in which the parents of at least one-half of the children enrolled have requested that the breakfast program be established;
3. students who qualify receive free or reduced-price meals;
4. all meals must meet USDA nutritional standards;
5. the management of food services complies with all federal, state and local regulations and
6. a summer meal program is provided to students attending a state-mandated summer remedial program.

All students are expected to eat lunch at school and may not leave school grounds during the lunch hour, except when permission has been granted by the principal. Students are permitted to bring their lunches from home and to purchase milk and incidental items.

School lunch funds and other food service funds are kept in a special account.

The District provides for at least one employee, who has received instruction in methods to prevent choking and has demonstrated an ability to perform the Heimlich maneuver, to be present while students are being served.

Students with Special Dietary Needs

At the beginning of each school year, or at the time of enrollment, parents are responsible for communicating any special dietary needs of their child, including food allergies, to the District. Students with dietary needs that qualify as disabilities under law are provided reasonable accommodation.

FOOD SALE STANDARDS

Through its food service program, the Board has a responsibility to encourage students to form healthful eating habits. Many students tend to eat nonnutritious or “junk” foods, which contribute to tooth decay, obesity, diabetes and heart disease. The Board enforces standards governing the types of food sold in the schools and the time and place at which each type of food is sold. These standards are based on the following guidelines.

1. The types of food sold in the schools are determined by their potential to contribute significantly to the daily nutritional needs of students and to enhance the District’s nutrition philosophy and nutrition education curriculum.
2. The time of day and place for the sale of food to students must be consistent with the nutrient intake needs and eating patterns of students and compatible with class schedules for schools within the District. Separate standards may be established for the types of food to be sold to staff members and for special or extracurricular events. The following restrictions should be enforced:
 - A. Vending machines offering foods or beverages which do not meet the nutritional standards established by the District may not be operated during the school lunch period.
 - B. School fund-raising activities, such as bake sales, may not be held during the school lunch period.
3. The food service coordinator reviews and recommends to the Board the types of foods to be sold as part of the school lunch program.

STUDENT WELLNESS PROGRAM

In response to the reauthorization of the Child Nutrition and Women, Infants and Children Act, the Board directs the Superintendent/designee to develop and maintain a student wellness program.

The student wellness program:

1. includes goals for nutrition education, physical activity and other school-based activities designed to promote student wellness;
2. includes nutrition guidelines for all foods available in the District during the school day in order to promote student health and reduce childhood obesity;
3. provides assurance that District guidelines for reimbursable school meals are, at a minimum, equal to the guidelines issued by the U.S. Department of Agriculture and
4. establishes a plan of implementation and evaluation, including designating one or more persons within the District with the responsibility for ensuring that the District is compliant with Federal law.

Development of the student wellness program is a collaborative effort between parents, students, food service workers, administrators, the Board and the public. The program is reviewed every three years.

STUDENT WELLNESS PROGRAM

As required by law, the Board of Education establishes the following wellness policy for the Grandview Heights City School District.

The Board recognizes that good nutrition and regular physical activity affect the health and well-being of the District's students. Furthermore, research suggests that there is a positive correlation between a student's health and well-being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

1. With regard to nutrition education, the District shall:
 - Include nutrition education in the Health curriculum so that instruction is sequential and standards-based and provides students with the knowledge, attitudes, and skills necessary to lead healthy lives.
2. With regard to physical activity, the District shall:
 - Provide a sequential, comprehensive physical education program for students in K-12 in accordance with the standards and benchmarks established by the state.
3. With regard to other school-based activities the District shall:
 - A. Schedule mealtimes so there is minimum disruption by recess and other special programs or events.
 - B. Provide attractive, clean environments in which the students eat.
 - C. Provide students, parents, and other community members access to, and be encouraged to use, the school's outdoor physical activity facilities outside the normal school day.

Furthermore, with the objectives of enhancing student health and well-being, and reducing childhood obesity, the following guidelines are established:

1. The food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages as well as to the fiscal management of the program.
2. As set forth in policy EFB, entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).
3. The food service program will provide all students affordable access to the varied and nutritious foods they need to be healthy and to learn well.
4. The food service program may involve students, parents, and/or school officials in the selection of competitive food items to be sold in the schools.
5. Nutrition information for competitive foods available during the school day shall be readily available near the point of purchase.
6. The food service program shall be administered by a director who is properly qualified, certificated, licensed, or credentialed, according to current professional standards.
7. Continuing professional development shall be provided for all staff of the food service program.
8. Food service personnel will encourage students to participate in the school lunch program.

The Board designates the Superintendent as the individual charged with operational responsibility for measuring and evaluating the District's implementation and progress under this policy. The Superintendent shall develop administrative guidelines necessary to implement this policy.

The Superintendent shall report on the District's compliance with this policy and the progress toward achieving the goals set forth herein when requested to do so by the Board.

Review of this policy shall occur every three years by a committee appointed by the Board consisting of a representative(s) of the Board, the administration, the food service provider, the parents, the students, and the public. The committee shall provide the Board with any recommended changes to this program.

(Approval date: December 22, 2009)

COPYRIGHT

The Board of Education directs its staff and students to use copyrighted works only to the extent that the law permits. The Board recognizes that Federal law applies to public school districts and the staff and students must, therefore, avoid acts of copyright infringement under penalty of law.

In order to help the staff and students abide by the laws set forth in Title 17 of the United States Code, the Board directs the Superintendent to provide administrative guidelines regarding the copying and distribution of copyrighted materials for instructional purposes and for the appropriate use of copyrighted material on the Board's web site.

Because the Board hosts a web site and stores information on it at the direction of users, it is classified as an on-line service provider for copyright purposes. In order to limit the Board's liability relating to material/information residing, at the direction of a user, on its system or network, the Board directs the Superintendent to annually appoint an individual as the agent to receive notification of claimed infringement. A link to the agent's name, mailing address, telephone number, fax number, and e-mail address shall appear on the home page of the Board's web site. Such contact information, along with the appropriate filing fee, shall also be provided to the Copyright Office of the Library of Congress.

Additionally, the agent's name, mailing address, telephone number, fax number, and e-mail address shall be included in the Student Handbook for each school.

The agent shall be responsible for investigating and responding to any complaints.

[Adoption date: December 22, 2009]

LEGAL REFS.: U.S. Const. Art. I, Section 8
Copyright Act, 17 USC 101 et seq.

COPYRIGHT

Educational Use of Copyrighted Print Materials

1. Fair use

The fair use of copyrighted work for purposes such as criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship or research is not an infringement of copyright. In determining whether the use made of a work in any particular case is a fair use, the factors to be considered include the:

- A. purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;
- B. nature of the copyrighted work;
- C. amount and substantiality of the portion used in relation to the copyrighted work as a whole and
- D. effect of the use upon the potential market for or value of the copyrighted work.

2. Single copying for teachers

A single copy may be made of any of the following by or for a teacher at his/her individual request for his/her scholarly research or use in teaching or preparation to teach a class:

- A. a chapter from a book;
- B. an article from a periodical or newspaper;
- C. a short story, short essay or short poem, whether or not from a collective work or
- D. a chart, graph, diagram, drawing, cartoon or picture from a book, periodical or newspaper.

3. Multiple copies for classroom use

Multiple copies (not to exceed more than one copy per student in a course) may be made by or for the teacher giving the course for classroom use or discussion, provided that:

- A. the copying meets the tests of brevity, spontaneity and cumulative effect as defined below and
- B. each copy includes a notice of copyright.

1) Brevity

Poetry: (a) a complete poem if fewer than 250 words and if printed on not more than two pages or (b) from a longer poem, an excerpt of not more than 250 words.

Prose: (a) a complete article, story or essay of fewer than 2,500 words or (b) an excerpt of not more than 1,000 words or 10% of the work, whichever is less, but in any event a minimum of 500 words.

Each of the numerical limits stated in "poetry" and "prose" above may be expanded to permit the completion of an unfinished line of a poem or of an unfinished prose paragraph.

Illustration: one chart, graph, diagram, drawing, cartoon or picture per book or periodical issue.

Special work: certain work in poetry, prose or "poetic prose", which often combines language with illustrations, of fewer than 2,500 words.

A "special work" may not be reproduced in its entirety. However, an excerpt comprising not more than two of the published pages of a special work, and containing not more than 10% of the words found in the text thereof, may be reproduced.

2) Spontaneity

The copying is at the instance and inspiration of the individual teacher. The inspiration and decision to use the work, and the moment of its use for maximum teaching effectiveness, are so close in time that it would be unreasonable to expect a timely reply to a request for permission.

3) Cumulative effect

The copying of the material is for only one course in the school in which copies are made.

Not more than one short poem, article, story or essay, or two excerpts, may be copied from the same author, nor more than three from the same collective work or periodical volume, during one class term.

The limitations stated in the preceding two paragraphs shall not apply to current news periodicals and newspapers and current news sections of other periodicals.

The limitations as to single copying for teachers and multiple copies for classroom use are applicable.

4. Prohibitions

- A. Copying shall not be used to create, replace or substitute for anthologies, compilations or collective works. Such replacements or substitutions may occur whether copies of various works or excerpts from there are accumulated or reproduced and used separately.
- B. There shall be no copying of or from works intended to be “consumable” in the course of study or teaching. These include workbooks, exercises, standardized tests, test booklets, answer sheets and similar consumable material.
- C. Copying shall not:
 - 1) substitute for the purchase of books, publishers’ reprints or periodicals;
 - 2) be directed by higher authority or
 - 3) be repeated with respect to the same item by the same teacher from term to term.
- D. No charge shall be made to the student beyond the actual cost of the photocopying.

Educational Use of Copyrighted Music

1. Permissible uses

- A. Emergency copying may be done to replace purchased copies which for any reason are not available for an imminent performance, provided purchased replacement copies shall be substituted in due course.

- B. For academic purposes other than performance, single or multiple copies of excerpts of works may be made, provided that the excerpts do not comprise a part of the whole which would constitute a performable unit such as a section, movement or area, but in no case more than 10% of the whole work. The number of copies shall not exceed one copy per student.
 - C. Printed copies which have been purchased may be edited or simplified, provided that the fundamental character of the work is not distorted or that lyrics, if any, are not altered or added.
 - D. A single copy of recordings of performances by students may be retained by the educational institution or individual teacher.
 - E. A single copy of a sound recording (such as a tape, disc or cassette) of copyrighted music may be made from sound recordings owned by an educational institution or an individual teacher for the purpose of constructing aural exercises or examinations and may be retained by the educational institution or individual teacher. (This pertains only to the copyright of the music itself and not to any copyright which may exist in the sound recording.)
2. Prohibitions
- A. Copying shall not be used to create, replace or substitute for anthologies, compilations or collective works.
 - B. Copying of or from works intended to be “consumable” in the course of study or of teaching such as workbooks, exercises, standardized tests, answer sheets and similar material is prohibited.
 - C. Copying shall not be used for the purpose of performance except as previously stated.
 - D. Copying shall not be used for the purpose of substituting for the purchase of music except as previously stated.
 - E. Copying without inclusion of the copyright notice which appears on the printed copy is prohibited.

Educational Use of Copyrighted Audiovisual Material

1. Before reproducing small portions of sound recordings, filmstrips, slide sets, transparencies or motion pictures, or videotaping commercial television broadcasts, employees shall consult with the principal to determine whether the proposed action complies with the “fair use” principles of the Copyright Act.

2. School recordings may be made of certain instructional television programs telecast by the local Public Broadcasting Systems educational television station. Before recording the telecast, the following conditions shall be satisfied.
 - A. The monthly list of programs not licensed for recording shall be consulted. Any program listed shall not be recorded.
 - B. Recordings may be used in classroom or instructional settings as an educational activity or at a PTA/PTO meeting, board meeting or similar activity.
 - C. Recordings shall be used only in the facilities of the District and shall not be loaned or made available outside of those facilities.
 - D. Recordings made from evening programs, which may be copied, shall be retained for no more than seven days following the telecast unless an extension is received in writing in advance. Daytime telecasts may be recorded and retained permanently unless otherwise notified.

Educational Use of Copyrighted Library Material

1. A library may make a single copy of unpublished work to replace a damaged, deteriorated, lost or stolen copy, provided that an unused replacement cannot be obtained at a fair price.
2. A library may provide a single copy of copyrighted material at cost to a student or staff member.
 - A. The copy must be limited to one article of a periodical issue or a small part of other material, unless the library finds that the copyrighted work cannot be obtained elsewhere at a fair price. Under the latter circumstances, the entire work may be copied.
 - B. The copy shall contain the notice of copyright, and the student or staff member shall be notified that the copy is to be used only for private study, scholarship or research. Any other use subjects the person to liability for copyright infringement.
3. At the request of the teacher, copies may be made for reserve use. The same limits apply as for single or multiple copies as previously stated.

Copying Limitations

1. Circumstances arise when personnel are uncertain whether or not copying is prohibited. In those circumstances, the Superintendent/designee shall be contacted. If the Superintendent/designee is uncertain, he/she shall consult with the District's legal counsel.
2. The following prohibitions have been expressly stated in federal guidelines.
 - A. Reproduction of copyrighted material shall not be used to create or substitute for anthologies, compilations or collective works.
 - B. Unless expressly permitted by agreement with the publisher and authorized by District action, there shall be no copying from copyrighted consumable materials such as workbooks, exercises, test booklets, answer sheets or similar materials.
 - C. Employees shall not:
 - 1) use copies to substitute for the purchase of books, periodicals, music recordings or other copyrighted material, except as permitted by District procedure;
 - 2) copy or use the same items from term to term without the copyright owner's permission;
 - 3) copy or use more than nine instances of multiple copying of protected material in any one term;
 - 4) copy or use more than one short work or two excerpts from works of the same author in any one term or
 - 5) copy or use protected materials without including a notice of copyright. The following shall constitute a satisfactory notice:

NOTICE: THIS MATERIAL MAY BE PROTECTED BY
COPYRIGHT LAW.
3. Employees shall not reproduce or use copyrighted material at the direction of a District administrator without permission of the copyright owner.

Computer Software Copyright

The Board recognizes that computer software piracy is a major problem for the industry, and that violations of copyright laws contribute to higher costs and lessen incentives for publishers to develop effective educational software. Therefore, in an effort to discourage software piracy and to prevent such illegal activity, the District will take the following steps.

1. The ethical and practical implications of software copyright violations will be provided to all employees and students using District computer facilities and software.
2. Employees and students will be informed that they are expected to adhere to the Copyright Act and all subsequent amendments thereto governing the use of software.
3. Wherever possible, efforts will be made to prevent software from being duplicated from floppy disks, hard drives or networked systems.
4. Illegal copies of copyrighted software shall not be made or used on District equipment.
5. District administrators shall be designated as the only individuals who may sign license agreements for educational software used on District computers.
6. Documentation of licenses for software used on District computers will be located at the site where the software is being used.

Unsupervised Copy Equipment

The following notice, in large type, shall be affixed to all District copying equipment (Xerox, Thermofax, audiotape recorder, videotape recorder and copy camera):

NOTICE: THE COPYRIGHT LAW OF THE UNITED STATES GOVERNS THE MAKING OF COPIES OF COPYRIGHTED MATERIAL. THE PERSON USING THIS EQUIPMENT IS LIABLE FOR ANY INFRINGEMENT.

Library Copying for Students or Staff

1. The following notice, in large type, shall be posted prominently where copies are made available to students or staff:

NOTICE: THE COPYRIGHT LAW OF THE UNITED STATES GOVERNS THE MAKING OF COPIES OF COPYRIGHTED MATERIAL.

2. The following notice, in large type, shall be posted prominently where print copies are made available to students and/or staff:

WARNING CONCERNING COPYRIGHT RESTRICTIONS

THE COPYRIGHT LAW OF THE UNITED STATES GOVERNS THE MAKING OF COPIES OR OTHER REPRODUCTION OF COPYRIGHTED MATERIAL.

UNDER CERTAIN CONDITIONS SPECIFIED IN THE LAW, LIBRARIES AND ARCHIVES ARE AUTHORIZED TO FURNISH A PHOTOCOPY OR OTHER REPRODUCTION. ONE OF THESE SPECIFIED CONDITIONS IS THAT THE PHOTOCOPY OR REPRODUCTION IS NOT TO BE "USED FOR ANY PURPOSE OTHER THAN PRIVATE STUDY, SCHOLARSHIP OR RESEARCH." IF A USER MAKES A REQUEST FOR, OR LATER USES, A PHOTOCOPY OR REPRODUCTION FOR PURPOSES IN EXCESS OF "FAIR USE," THAT USER MAY BE LIABLE FOR COPYRIGHT INFRINGEMENT.

THIS INSTITUTION RESERVES THE RIGHT TO REFUSE TO ACCEPT A COPYING ORDER IF, IN ITS JUDGMENT, FULFILLMENT OF THE ORDER WOULD INVOLVE VIOLATION OF COPYRIGHT LAW.

(Approval date: December 22, 2009)

TELEPHONE SERVICES

District telephones are provided for official school use. In order to permit staff members to make necessary personal calls with minimum loss of time, certain telephones may be used for personal calls. Staff members making personal calls are responsible for and shall pay any long distance and/or toll charges.

Students are not to use the school office telephones without permission, except in cases of emergency.

Cellular telephones may be provided to certain staff members as determined by the Superintendent.

The Board provides cellular telephones to employees who by the nature of their job have a routine and continuing business need for the use of same for official Board business. Cellular telephones are provided as a tool to conduct Board business and to enhance business efficiencies. Cellular telephones are not a personal benefit and are not a primary mode of communication, unless they are the most cost-effective means to conduct Board business (i.e., because cellular telephone accounts are billed on a time-used basis, Board-owned cellular telephones and services should not be used when a less costly alternative method of communication is safe, convenient and readily available).

The Superintendent or his/her designee is expected to see that:

1. the need for each Board-owned cellular telephone and cellular telephone service account is clearly justified for Board business purposes;
2. alternative solutions for work production and communication have been considered;
3. employees provided with cellular telephone service accounts understand the purpose and limitations of usage;
4. cellular telephone service account invoices outlining the details of usage are received and reviewed for conformance with this policy;
5. employees reimburse the Board for nonbusiness use if required by this policy and
6. the use of a cellular telephone service account is terminated when no longer justified by business requirements, the employee leaves the Board's employment and/or when the employee has by actions demonstrated a disregard for the limitation of this policy.

The Board authorizes the Superintendent or his/her designee to develop administrative guidelines for the proper handling of use and charges.

DATA AND RECORDS RETENTION

All records¹ are the property of the District and are not removed, destroyed, mutilated, transferred or otherwise damaged or disposed of, in whole or in part, except as provided by law or under the rules adopted by the District Records Commission (Commission). Such records shall be delivered by outgoing officials and employees to their successors and shall not be otherwise removed, transferred or destroyed unlawfully.

The Commission is composed of the Board President, the Treasurer and the Superintendent and meets at least once every 12 months.

The functions of the Commission are to review applications for one-time records disposal and schedules of records retention and disposition submitted by any employee of the District. Records may be disposed of by the District pursuant to the procedure outlined below. The Commission may at any time review any schedule it has previously approved and may revise that schedule.

The Superintendent designates a Records Officer in each department/building who is responsible for all aspects of records retention, including electronic mail, within that department/building.

When District records have been approved for disposal, the Commission sends a list of such records to the Auditor of State. If he/she disapproves the action by the Commission, in whole or in part, he/she so informs the Commission within a period of 60 days, and these records are not destroyed. Before public records are disposed of, the Ohio Historical Society is informed and given the opportunity for a period of 60 days to select for its custody such public records as it considers to be of continuing historical value.²

Electronic Mail

Electronic mail sent or received by the Board and/or District employees may be considered a public record subject to public disclosure or inspection under Ohio's Sunshine Law. Upon sending or receiving electronic mail, all users shall segregate or store public electronic mail records.

All Board and District electronic mail communications are monitored in accordance with the attached regulation (EHA-R) to ensure that all public electronic mail records are retained, archived and destroyed in compliance with State law.

District employees are subject to disciplinary action for violation of this policy and regulation.

¹Records include documents, devices or items, regardless of physical form or characteristic, created or received by or coming under the jurisdiction of the District which serves to document the organization, functions, policies, decisions, procedures, operations or other activities of the District. ORC Section 149.011

²The Historical Society may not review or select for its custody the records set forth in ORC Section 149.41(A) and (B).

DATA AND RECORDS RETENTION (Electronic Mail)

The Ohio Electronic Records Committee has established the following guidelines for managing electronic mail (e-mail).

Retention or disposition of e-mail messages must be related to the information they contain or the purpose they serve. The content, transactional information and any attachments associated with the message are considered a record (if they meet State law criteria). Because the content of e-mail messages may vary considerably, the content must be evaluated to determine the length of time messages must be retained.

There are two categories of e-mail retention: non-record messages and official record messages.

Non-Record Messages

E-mail messages that do not meet the criteria of the Ohio Revised Code definition of a record may be deleted at any time, unless they become part of some official record as a result of special circumstances. These items may be immediately deleted, or maintained in a "Non-Record" mail box and deleted later, just as you might trash unwanted publications or promotional flyers.

Types of messages may include:

1. Personal Correspondence: Any e-mail not received or created in the course of state business may be deleted immediately, since it is not an official record. Examples include, but are not limited to, the "Let's do lunch" (not a business lunch) or "Can I catch a ride home" type of note.
2. Non-State Publications: Publications, promotional material from vendors and similar materials that are "publicly available" to anyone are not official records. In the electronic world, this includes list serve messages (other than those you post in your official capacity), unsolicited promotional material ("spam"), files copied or downloaded from Internet sites, etc.

Official Record Messages

E-mail messages that meet the definition of a record in the ORC are official records and must be scheduled, retained and disposed of as such. These official records fall into the following categories:

1. Transient Messages: This type of e-mail has a very limited administrative value. Transient messages do not set policy, establish guidelines or procedures, certify a transaction or become a receipt. The informal tone of transient messages might be compared to a communication that might take place during a telephone conversation in an office hallway.

Transient Documents: Include telephone messages, drafts and other limited documents which serve to convey information of temporary importance in lieu of oral communication.

Retention: Until no longer of administrative value, then destroy

2. Intermediate Messages: E-mail messages that have more significant administrative, legal and/or fiscal value but are not scheduled as transient or permanent should be categorized under other appropriate record series. These may include (but are not limited to):
 - A. General Correspondence: Includes internal correspondence (e.g., letters, memos); also, correspondence from various individuals, companies and organizations requesting information pertaining to agency and legal interpretations and other miscellaneous inquiries. This correspondence is informative (it does not attempt to influence District policy).

Retention: 1 year, then destroy
 - B. Routine Correspondence: Referral letters, requests for routine information or publications provided to the public by the District which are answered by standard form letters.

Retention: 6 months, then destroy
 - C. Monthly and Weekly Reports: Document status of ongoing projects and issues; advise supervisors of various events and issues.

Retention: 1 year, then destroy

- D. Minutes of Agency Staff Meetings: Minutes and supporting records documenting internal policy decisions.

Retention: 2 years, then transfer to State Archives for their possible retention or destruction

3. Permanent Messages: E-mail messages that have significant administrative, legal and/or fiscal value and are scheduled as permanent also should be categorized under the appropriate record series. These may include, but are not limited to:

- A. Executive Correspondence: Correspondence dealing with significant aspects of the administration of executive offices. Correspondence includes information concerning policies, program, fiscal and personnel matters.

Retention: 2 years, then transfer to State Archives

- B. Departmental Policies and Procedures: Includes published reports, unpublished substantive reports and policy studies.

Retention: Retain until superseded, obsolete or replaced, then transfer to State Archives for their possible retention and destruction

INSURANCE MANAGEMENT

The Board has the responsibility to maintain an adequate and comprehensive insurance program covering its buildings and grounds, Board-owned vehicles and individuals discharging responsibilities for the District.

The Superintendent administers the total insurance program.

The District makes efforts to obtain insurance at the most economical cost, consistent with required coverage and service, through obtaining quotations or bids.

LIABILITY INSURANCE

The Board of Education recognizes the risks it faces in the ordinary course of conducting a school program and chooses to insure itself against certain liabilities as a result of said risks.

The Board shall, in accordance with law, insure its employees against injury or death resulting in the course of their employment and chooses also to:

1. insure members of the Board, officers, Superintendent, and other administrators of the District against liability for damages for death, injury to person, or damage or loss of property caused by the negligent act or omission of the member, officer or employee when acting within the scope of his/her office or employment;
2. insure against any major liability arising from the use of a motor vehicle by an employee of the District in the performance of District business;
3. procure liability and property damage insurance covering each motor van and accident insurance covering all students and other authorized passengers according to law.

The Board will pay no claims for damages to property and injuries to persons for which it has no liability in accordance with Ohio law.

PROPERTY INSURANCE

The Board of Education recognizes its responsibility to keep all insurable property of this School District, real and personal, insured for its replacement value against loss or damage by fire and has adopted as policy the extension of that coverage.

The Board shall invite sealed quotations for buildings and contents insurance and may reject any or all bids received. In placing the insurance coverage, the Board shall be guided by:

1. the price of such coverage,
2. the ability of the insurer to meet prescribed obligations promptly and fully, and
3. the reputation and past performance of the agent of the insurer.
